AQUAESTIL

MASAŽNI BAZENI
HOT TUBS

SPA

Odavno je poznato da masaža ima brojne blagotvorne učinke na tijelo, poboljšavajući cirkulaciju, opuštajući mišiće i smanjujući stres. U hidromasažnim kadama, vođeni podražaji dodatno smanjuju napetost u mišićima, povećavajući učinkovitost masaže zahvaljujući dugotrajnim i ciljanima efektima na velike mišićne skupine – bez rizika od ozljeda.

Aquaestil SPA masažni bazeni omogućuju luksuzno spa iskustvo u udobnosti vašeg doma, luksuznog apartmana, vile ili hotela. Izrađene od visokokvalitetnih materijala, pružaju izniman osjećaj udobnosti, dugotrajan otpor na oštećenja i vanjske utjecaje, visoki higijenski standard, te jednostavno čišćenje i održavanje.

Kombinacija vodene i zračne masaže, uz opcije poput kromoterapije, pospješuju oporavak i revitalizaciju tijela, dok značajke poput naprednog sustava filtriranja vode i učinkovite toplinske izolacije upotpunjuju bezbrižno iskustvo užitka u blagodatima masaže s Vašim najmilijima.

It has long been known that massage has numerous beneficial effects on the body, improving circulation, relaxing muscles, and reducing stress. In hydrotherapy bathtubs, water-induced stimuli further reduce muscle tension, enhancing the effectiveness of the massage through long-lasting and targeted effects on large muscle groups – without the risk of injury.

Aquaestil SPA hot tubs provide a luxurious spa experience in the comfort of your home, luxury apartment, villa, or hotel. Made from high-quality materials, they offer exceptional comfort, long-lasting resistance to damage and external influences, high hygienic standards, and easy cleaning and maintenance.

The combination of water and air massage, along with options like chromotherapy, promotes recovery and revitalization of the body, while features such as advanced water filtration systems and efficient thermal insulation complete the carefree experience of enjoying the benefits of massage with your loved ones.

AQUAESTIL SPA

oprema i značajke

Kontrola
Control

Elektronska kontrola rada predstavlja ključnu komponentu svakog SPA bazena, omogućujući intuitivno i jednostavno upravljanje svim funkcijama. *The electronic control system is a key component of every SPA tub, ensuring intuitive and easy management of all functions.*

Ozon generator
Ozone generator

Ozon generator iz zraka komprimira kisik i pretvara ga u ozon, koji djeluje kao prirodni dezinficijens. Ozon učinkovito uništava mikroorganizme, osiguravajući kristalno čistu vodu za bezbrižno iskustvo opuštanja. *The ozone generator compresses oxygen from the air and converts it into ozone, which acts as a natural disinfectant. Ozone effectively destroys microorganisms, ensuring crystal-clear water for a carefree relaxation experience.*

Vodena pumpa
Hydro pump

Vodena pumpa velike protočne snage uz 2 ili 3 ks i SILENT karakteristiku rada osigurava energetska učinkovitost i tihi rad, istovremeno pružajući snažan protok vode. *A high-flow water pump with 2 or 3 hp and SILENT operation ensures energy efficiency and quiet performance, while simultaneously delivering powerful water flow.*

Antibakterijski filter
Antibacterial filter

Antibakterijski filter s aktivnim ugljenom i vrlo sitnim filtracijskim perforacijama predstavlja fizičku barijeru koja štiti od svakodnevnih nečistoća iz okoliša, osiguravajući savršeno čistu vodu. *The antibacterial filter with activate carbon and very fine filtration perforations acts as a physical barrier against everyday debris from the environment, ensuring perfectly clean water.*

Kompresor
Compressor

Snažna zračna pumpa s integriranom termalnom komponentom opskrbljuje svaku zračnu mlaznicu zagrijanim zrakom, pružajući dodatni komfor i učinkovito pomažući u zagrijavanju vode. *A powerful air pump with an integrated thermal component supplies each air nozzle with warm air, providing extra comfort and efficiently helping to heat the water.*

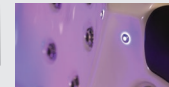

Aromaterapija
Aromatherapy

Obogatite iskustvo opuštanja umirujućim esencijama. Pažljivo odabrani mirisi stvaraju harmoniju uma i tijela, pružajući osjećaj duboke relaksacije i potpune regeneracije. *Enhance your relaxation experience with soothing essences. Carefully selected scents create harmony between mind and body, delivering deep relaxation and complete regeneration.*

Cirkulacijska pumpa
Circular pump

Cirkulacijska pumpa neprestano pokreće vodu kroz filtere i grijače, osiguravajući čistu i optimalno zagrijanu vodu za potpuno opuštanje. *The circulation pump continuously moves water through the filters and heaters, ensuring clean and optimally heated water for ultimate relaxation.*

Smart LED rasvjeta
Smart LED light

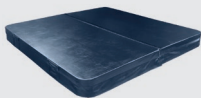

Svjetlost ima dokazano pozitivan utjecaj na raspoloženje i opuštanje. Snažan LED sustav s bogatim spektrom boja stvara očaravajuće efekte u vodi, pretvarajući svaki trenutak u vizualni doživljaj. *Light has a proven positive effect on mood and relaxation. A powerful LED system with a rich color spectrum creates mesmerizing effects in the water, turning every moment into a visual experience.*

equipment & features

Vodne i zračne mlaznice Hydro & Aero jets

Mlaznice pružaju iskustvo vodene i zračne masaže bez premca, stvarajući vizualni efekt kretanja vode i taktilni doživljaj koji angažira sva osjetila, osiguravajući potpuno iskustvo opuštanja. *The jets provide an unparalleled experience of water and air massage, creating a visual effect of moving water and a tactile sensation that engages all the senses, ensuring a complete relaxation experience.*

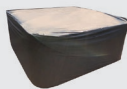

Termo pokrivač Thermal covering

Termo pokrivač štiti SPA bazen kada nije u upotrebi i pomaže u zadržavanju topline vode. Izrađen je od PU pjene visoke gustoće obložene termo PE folijom, dok navlaka u efektu sintetičke kože osigurava otpornost na vlagu i UV zračenje. *The thermal covering protects the SPA tub when not in use and helps retain water heat. Made from high-density PU foam coated with thermal PE foil, while the synthetic leather-effect cover ensures resistance to moisture and UV radiation.*

Grijač Heater

Grijač snage 3 kW omogućuje brzo i učinkovito zagrijavanje vode. Programibilan je na razini od 0.5°C, pružajući preciznu kontrolu temperature za optimalno iskustvo opuštanja. *The 3 kW heater provides fast and efficient water heating. It is programmable in increments of 0.5°C, offering precise temperature control for an optimal relaxation experience.*

Cerada Tarpaulin

Cerada pruža dodatnu zaštitu Vašem SPA masažnom bazenu tijekom duljih perioda nekorisćenja, štiteći je od vanjskih utjecaja. Izrađena po mjeri za vaš model, visoko vodootporna i jednostavna za postavljanje. *The tarpaulin, along with the thermal covering, provides additional protection for your SPA hot tub against external elements during extended periods of non-use. Custom-made for your model, highly waterproof and easy to install.*

Izolacija Insulation

Napredna izolacija osigurava brže zagrijavanje vode, manju potrošnju energije i dulji vijek trajanja električnih komponenti. Ostvarena je upotrebom visokokvalitetne PU izolacije debljine 10 do 30 mm, impregniranom Al folijom za dodatnu učinkovitost. *Advanced insulation ensures faster water heating, lower energy consumption, and a longer lifespan for electrical components. Achieved using high-quality PU insulation 10 to 30 mm thick, impregnated with Al foil for added efficiency.*

Stepenice Steps

Stepenice olakšavaju ulazak i izlazak iz Vašeg SPA masažnog bazena, pružajući dodatnu sigurnost i udobnost. Lagane, praktične i jednostavne za održavanje. *The steps make entering and exiting your SPA hot tub easier, providing extra safety and comfort. Lightweight, practical, and easy to maintain.*

Nosiva konstrukcija Bearing structure

Rigidna i čvrsta konstrukcija osigurava dugotrajnost i omogućuje premještanje SPA bazena bez torzijskih deformacija i izvijanja. Dizajnirana je na način da ne prenosi zvukove rada električnih komponenti. *A rigid and durable structure ensures longevity and allows the SPA tub to be moved without torsional deformation or twisting. Designed in a way that prevents the transmission of operational sounds from electrical components.*
